

GigaTrust Names Lesley Gorog Harris Vice President Business Development

Herndon, VA., March 6, 2007 – GigaTrust (also known as GigaMedia Access Corporation), the emerging market leader in the Content Security and Rights Management Services (RMS) market, today announced the appointment of Lesley Gorog Harris to the position of Vice President Business Development. Ms. Harris brings 30 years of experience and expertise in sales and business development in both the private and public sectors.

“I’m pleased to welcome Lesley to the team,” said Bob Bernardi, GigaTrust Chairman and CEO. “She brings a wealth of experience to our sales and business development teams, exceptional leadership in channel and partner programs, and an outstanding track record in launching innovative initiatives. We are looking to Lesley’s extraordinary management skills to help us develop additional vertical markets and strategies to penetrate and dominate them.”

Ms. Harris had a long and distinguished career at IBM Corporation and most recently at Lenovo where she held positions of ascending responsibility in sales, channel leadership and business development. Most recently, she served as Program Director of Lenovo’s Government and Education Direct business unit. From 2000 until 2005, Ms. Harris was instrumental in the development of the go-to-market sales strategy for the Government and Education business unit at IBM.Com which resulted in over \$200 million in revenue in the first three years. During her career, she spent 20 years within the Government sector at IBM creating both direct and indirect routes to market which included leading the Federal Channel within the IBM Personal Computer Division.

Ms. Harris received a Bachelor of Arts from DePauw University, Greencastle, Indiana, and has completed executive management classes at IBM. She has won numerous awards, including the IBM President’s Award, and IBM’s Win America award for her innovation in the launch of the IBM.Com Government and Education Direct business unit.

About GigaTrust:

GigaTrust is the emerging market leader in the Content Security and Rights Management Services (RMS) market. GigaTrust software is especially valued in the public and private sector as a trusted method of controlling intellectual property and private data even after it has been delivered or removed from the network. GigaTrust protects email, file explorer, and web server application content without changing the way users work. Additional features include PDF support, dynamic revocation, compliance reporting, and the indexing of protected content as it is archived. GigaTrust offers a server-based solution for large enterprises, as well as a Managed Service for individuals and small businesses that do not want to set up an RMS server or reconfigure their firewalls. GigaTrust, a Microsoft Gold Certified Partner, extends Windows RMS to Blackberry, Macintosh, and Linux. For more information about GigaTrust, visit www.gigatruster.com.
