

## PRODUCT OVERVIEW

# GigaTrust Enterprise Plus: Going beyond network boundaries

### Challenges outside the enterprise:

How can the security of RMS be extended outside the organization and control maintained?

Can this be done without adding business partners to the "Active Directory?"

Can policy enforcement be automated?

Can PDFs and other non-Microsoft file formats be protected?

### GigaTrust Enterprise Plus is the answer to enterprise content security and secure collaboration with your business partners

Automated, persistent content protection is a necessary element of complete enterprise security architecture that seamlessly complements your existing perimeter security solution with content protection. GigaTrust Enterprise Plus provides the tools to automate the protection of your sensitive documents and intellectual property, and allows you to share those documents with your business and supply chain partners.

GigaTrust Enterprise Plus is part of the Intelligent Rights Management™ family of products designed to extend and enhance the Microsoft® Windows® Rights Management Services (RMS) platform. GigaTrust Enterprise Plus provides valuable capabilities for both individual users as well as the RMS administrative team. We make it easy for individual users within your organization to take full advantage of the security features in RMS that allow for secure collaboration and communication throughout your organization. We provide the tools that enable your RMS administrative team to understand how RMS is being used throughout the organization—by whom, when, and which documents to protect—as well as the guidelines to develop policies that automate the protection of content.

GigaTrust Enterprise Plus allows administrators to establish rules that automatically apply policies that support existing business processes as well as share select policies with individual team members. By mapping RMS templates to policy rules, the Microsoft Outlook Mail Client will automatically protect email and attachments based on the content of the email. GigaTrust provides an easy way for non-technical users to adhere to policies. This Enterprise Plus feature can automatically prevent the exposure of intellectual property, sensitive and private data, or corporate strategy documents.

### Features of GigaTrust Enterprise Plus—Beyond RMS:

- **Automated provisioning of external users.** Add business partners to your secure RMS communication environment.
- **Policy rules.** Enforce centralized policies based on the actual content of an email.
- **Reporting.** Track users and documents, and gain insight into RMS usage patterns.
- **Revoke content.** Revoke access to RMS-protected content instantly.
- **Added granularity for email control.** Control printing, copying, expiration and saving.
- **File types.** Use GigaTrust to protect additional file types such as PDF, HTML and image files.

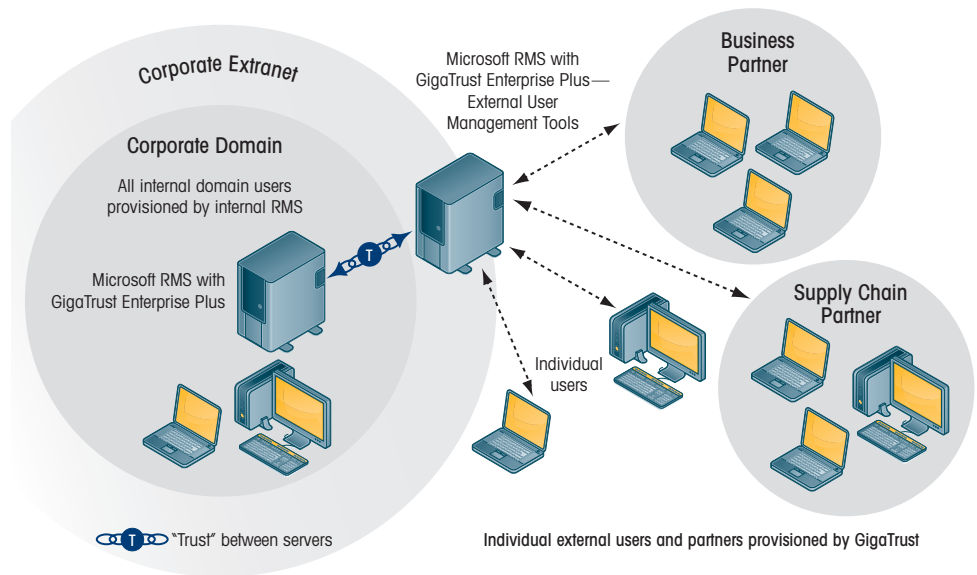

With GigaTrust Enterprise Plus, you can:

- **Enforce** information policies that automatically protect emails.
- **Automate** the creation of User Accounts for external parties with a thin provisioning client on a:
  - Group basis, or an
  - Ad hoc, one-by-one basis
- **Create Allow/Block lists** for an added level of granularity of control.
- **Build and maintain** a secure communication network for your business partners and supply chain.
- **Allow** users to build ad hoc and specialized policy rules.
- **Ensure** compliance with privacy laws and government regulations.
- **Revoke** permissions—quickly and easily.
- **Protect** non-Microsoft documents, including PDFs.
- **View** reports of *authorized* and unauthorized attempts to view content.

GigaTrust Enterprise Plus benefits include:

- **Secure separation from enterprise domain.** Builds a secure messaging network with your supply chain without giving anyone access to your network.
- **Easy administrative control.** Enables provisioning, authentication and management of external users without requiring them to be added to a domain within your enterprise's Active Directory.
- **Protected two-way communications.** Provides a mechanism for external recipients to protect the information they want to send back to you.

Figure 1. GigaTrust Enterprise Plus enables content to be securely sent and protected outside the enterprise

**The challenge of securing content is global.**

**The technology solution is available now.**

**The answer is GigaTrust Enterprise Plus: Persistently protect your sensitive information—wherever it travels, however it's used.**

## About GigaTrust

GigaTrust is a cutting-edge provider of email and content security software products and services with customers in both the public and private sectors. GigaTrust is the only provider of the Intelligent Rights Management™ solution, which combines innovative, next-generation content security technologies built on the foundation of Microsoft® Windows® Rights Management Services. In February 2003, the firm formed a strategic partnership with Microsoft and formally launched the first in the family of proprietary Intelligent Rights Management products based on the

Rights Management Services (RMS) security platform. GigaTrust is a Microsoft Gold Certified Partner. GigaTrust's family of products and services is easy to use and easy to deploy for either the author or recipient of protected content. GigaTrust's products and services include security solutions for email and document protection, automated external user provisioning, web content, network file shares, e-discovery enablement, and the BlackBerry mobile device.
