

PRODUCT OVERVIEW

GigaTrust Enterprise Plus: Delivering RMS Enterprise Management and Administration

Challenges inside and outside the enterprise:

- Can you build and maintain a secure communications network for your business and supply chain partners?
- Can policy enforcement be automated?
- Can permissions revoked as needed?
- Can you accommodate different policy needs of different departments or individuals?
- How can you best monitor the current status of your RMS environment?
- Can PDFs and other non-Microsoft file formats be protected?

Features of GigaTrust Enterprise Plus — Beyond RMS:

- **Policy rules.** Enforce information policies that automatically create content (including emails) policy and assign it to roles within the organization.
- **Automate provisioning of external users.** Add business partners to your secure RMS communication environment.
- **Dashboard.** Provides a graphical snapshot of current RMS status.
- **Reporting.** Track users and documents, and view reports of authorized and unauthorized attempts to view content.
- **Revoke content.** Revoke access to RMS-protected content instantly.
- **Added granularity for email control.** Control printing, copying, expiration and saving.
- **File types.** Use GigaTrust to protect additional file types such as PDF, HTML and image files.

GigaTrust Enterprise Plus enhances the administration of Microsoft's RMS and extends its functionality and reach inside and outside the enterprise

For Enterprise Rights Management (ERM) to be truly effective and deliver automated, persistent content protection, it must be able to scale in service capacity, handle business communities of varied sizes and provide administrative flexibility. GigaTrust Enterprise Plus provides this and more. GigaTrust Enterprise Plus automates the protection of your sensitive documents and intellectual property both inside *and* outside the enterprise allowing you to share content with your employees as well as business and supply chain partners.

GigaTrust Enterprise Plus, our console for Microsoft's® Rights Management Services (RMS), extends and enhances the administrative reach of RMS by providing seamless policy delegation while maintaining administrative oversight—whether it be at the

business unit, departmental or individual business user level—you decide and control both internal and external users of protected content. GigaTrust Enterprise Plus provides the IT department with the capability to identify the people, the communications and the policies that will be used to persistently protect content (at rest, in transit and in use).

GigaTrust Enterprise Plus is part of the Intelligent Rights Management™ family of products designed to extend and enhance Microsoft's RMS platform. GigaTrust Enterprise Plus provides valuable capabilities for both individual users as well as the RMS administrative team. We make it easy for individual users within your organization to take full advantage of the security features in RMS that allow for secure collaboration and communication throughout your organization. We provide the tools that enable your RMS administrative team to designate content policy creation to the content owners and to create role-based content policies for how RMS is to be used throughout the organization—by whom, when, and which documents to protect.

Figure 1. Sample Dashboard of General Activity

With GigaTrust Enterprise Plus, you can:

- Enforce information policies that automatically protect emails.
- Automate the creation of user accounts for external parties on a group basis, or an ad hoc, one-by-one basis.
- Create/Allow/Block lists for an added level of granularity of control.
- Build and maintain a secure communication network for your business partners and supply chain.
- Allow users to build ad hoc and specialized policy rules.
- Ensure compliance with privacy laws and government regulations.
- Revoke permissions—quickly and easily.
- Create policies that automate the protection of Office documents as well as a wide range of third-party file formats such as PDF.
- View reports in real time about user activity, document access, policy creation and modification, and potential malicious activity.

GigaTrust Enterprise Plus benefits include:

- Policy decisions that can be delegated downward within the enterprise to accommodate different needs of different departments or individuals.
- Centralized control for mistakenly shared or no longer relevant content.
- Reporting that provides for trends as well as potential trouble spots.
- Audit trails that provide accountability and verification of policy creation and enforcement.
- System alerts and dashboard that add an additional level of visibility and control.

Sample Administrator Activity

The screenshots show the GigaTrust Enterprise Plus Administration interface. The top screenshot displays the 'Administrator Activity' report, showing a list of activities with columns for Security Principal, Activity Type, and Activity Date Range. The bottom screenshot shows a 'Document Report' for a specific document, listing document details such as Name, Owner Email, Date Protected, GUID, and Template Name, along with a table of users who accessed the document.
