

PRODUCT OVERVIEW

GigaTrust Protector for Exchange

Extends RMS for Exchange and protects PDF & More

GigaTrust Protector for Exchange provides:

- Extension of RMS to file formats supported by Adobe Reader/Acrobat
- Office 2007/2010/2013 and support for blacklisting applications—screen scrapers and remote sharing—while viewing RMS-protected files in Microsoft Word, PowerPoint and Excel
- Content access secured directly in native applications
- Content protection applied automatically in Exchange

The Intelligent Rights Management approach

GigaTrust provides enterprises with Intelligent Rights Management, building value on the foundation provided by Microsoft’s Rights Management Services (RMS). Our solutions allow users to access (create, share and collaborate) and protect content **at rest...in transit...and in use** within and outside the enterprise. The combination of RMS from Microsoft and applications from GigaTrust offer you the ability to protect your intellectual property, securely collaborate with partners and meet regulatory and corporate governance compliance goals in more ways, on more platforms and in more places than ever before.

GigaTrust Protector for Exchange

Microsoft rights-enabled Exchange with the release of Microsoft Exchange Server 2010 and support for 2013. With native RMS support you can rights-protect Outlook messages and Office documents from Microsoft Word, Excel and PowerPoint as they are sent and distributed out from your

Exchange Server. In addition, GigaTrust has extended RMS within the Exchange platform to enable the protection of PDF files as well as a variety of other files. Organizations are using Exchange Server as their messaging platform.

While Exchange provides the built-in capability to protect messages and documents created in Word, PowerPoint and Excel, it doesn’t address popular formats such as PDF. That is where the GigaTrust Protector for Exchange comes in.

The GigaTrust Protector for Exchange solution is a combination of a server side application that is integrated into the Exchange servers and our secure client that enforces the rights directly in their native applications—for example, protected PDFs are viewed securely in Adobe Reader. This architectural approach allows for seamless integration into an operating environment with minimal change in user behavior.

Supported File Types

Application	Version	File Type
Adobe Reader	v9.5, v10.1.x, v11.x	PDF
Adobe Acrobat	v9.5, v10.1.x, v11.x	PDF
Microsoft Excel	2007*/2010*/2013	XLS, XLSX
Microsoft PowerPoint	2007*/2010*/2013	PPT, PPTX, PPS (2003/2007), PPSX (2007 only)
Microsoft Word	2007*/2010*/2013	DOC, DOCX

*Viewing: Blacklist support only

The GigaTrust Protector for Exchange solution is a combination of a server side application that is integrated into the Exchange servers and our secure client that enforces the rights directly in their native applications—for example, protected PDFs are viewed securely in Adobe Reader. This architectural approach allows for seamless integration into an operating environment with minimal change in user behavior.

The GT Protector for Exchange provides the following:

- Content access secured directly in native applications
- Content protection applied automatically in Exchange. This approach to protection of intellectual property and compliance with regulatory and corporate governance policies is changing the way people communicate and collaborate in their everyday work life.

Benefits include:

- Customers can derive a higher value for their investment in Microsoft RMS and Exchange
- Providing security to more forms of an enterprise's intellectual property
- Administration of this new capability is done directly within Exchange

RMS and GigaTrust spell customer success

More and more companies are required to control distribution and access to the information that runs their business. The integration of Microsoft's RMS into the Exchange platform serves as a great foundation to address this challenge. With the addition of GigaTrust's Protector for Exchange, information control can be applied in specific ways for different industries and to different business functions that use varied file formats. These RMS-enabled solutions allow forward-thinking companies to better serve their customers and employees—not by reacting to regulation but by leveraging this leading technology.
