

## SUCCESS STORY

# Global Management Consulting for a Public Sector Client

### Client We Served

A leading global management consulting firm that assists government clients with services to solve tough problems in strategy, operations, organization and change, and information technology.

### Problem We Solved

Microsoft® Rights Management Services was deployed throughout the client enterprise to protect confidential account information that was typically shared with others within the organization. As users began to share RMS-protected content within the workplace it became immediately apparent that this confidential information also needed to be viewed on their BlackBerry mobile devices.

GigaTrust's quick response to their needs and the ease of deploying GigaTrust for BlackBerry has allowed the client to respond to user requirements and address the content security needs of the organization.

### Product Implemented

GigaTrust worked with the management consulting firm and set up demonstrations of the GigaTrust for BlackBerry product. The public sector client quickly saw the ease of use, the value of the solution and how it fit with their content security strategy.

### Client Satisfaction Is the Proof

“Our clients depend on us to deliver the right security strategy and GigaTrust is our go-to solution to ensure content is protected when sending/receiving and using information on BlackBerry mobile devices.”

## About GigaTrust

GigaTrust is a cutting-edge provider of email security and content protection software products and services with customers in both the public and private sectors. GigaTrust is the only provider of the Intelligent Rights Management™ solution, which combines innovative next-generation content security technologies built on the foundation of Microsoft® Rights Management Services. In February 2003, the firm formed a strategic partnership with Microsoft and formally launched the first in the family of proprietary Intelligent Rights Management products based on the Rights

Management Services (RMS) security platform. GigaTrust is a Microsoft Silver Certified Partner. GigaTrust's family of products and services is easy to use and easy to deploy for either the author or recipient of protected content. GigaTrust's products and services include security solutions for email/attachments and document protection, automated external user provisioning, web content, network file shares, content repositories, discovery enablement, and mobile device support.
