

SUCCESS STORY

Financial Services

Client We Served

A global financial institution offering banking, insurance and asset management to private, corporate and institutional clients in more than 50 countries doing business online, over the phone and by mail.

Problem We Solved

This institution was looking for a solution that would enhance securing their data and allow them to meet regulatory compliance issues such as Gramm-Leach-Bliley Act (GLBA). They wanted to ensure that the information of their 60 million customers remained safeguarded.

Products Implemented

The financial institution looked to Microsoft® and GigaTrust to deliver a solution to meet these needs. They chose Microsoft Rights Management Services in conjunction with GigaTrust Enterprise Plus, GigaTrust Protector for SharePoint 2007 and GigaTrust Dynamic File Folders, which were implemented to increase this client's security and protect their customers' highly sensitive information.

Client Satisfaction Is the Proof

“We share critical financial information every day that affects markets across the world, communicating with our partners and clients knowing that only those people we've selected can view this sensitive data—GigaTrust lets us sleep at night.”

About GigaTrust

GigaTrust is a cutting-edge provider of email security and content protection software products and services with customers in both the public and private sectors. GigaTrust is the only provider of the Intelligent Rights Management™ solution, which combines innovative next-generation content security technologies built on the foundation of Microsoft® Rights Management Services. In February 2003, the firm formed a strategic partnership with Microsoft and formally launched the first in the family of proprietary Intelligent Rights Management products based on the Rights

Management Services (RMS) security platform. GigaTrust is a Microsoft Silver Certified Partner. GigaTrust's family of products and services is easy to use and easy to deploy for either the author or recipient of protected content. GigaTrust's products and services include security solutions for email/attachments and document protection, automated external user provisioning, web content, network file shares, content repositories, discovery enablement, and mobile device support. For more information about GigaTrust, visit www.gigatruster.com.
