Manufacturing

Client We Served

A global leader in silicones, silicone-based technology and innovation, this company was an early adopter of the Microsoft® Rights Management Services (RMS) platform.

Problem We Solved

A major requirement was the need to protect client files being viewed with eDrawings within a location in the Asia Pacific. This location represented major growth potential for the client as they expanded into new markets. The company's concern centered on being able to share sensitive building drawings and machining practices, along with future research and development data that would be created out of new silicone products.

Product Implemented

GigaTrust began working with this client in early November 2008 via online meetings and web demos. The GigaTrust Enterprise Plus product was introduced as a solution to their need to share and protect their data with outside vendors, customers and partners.

The GigaTrust team quickly put together a test site to show how the manufacturing company's vendors and partners could view and protect files via eDrawings. GigaTrust also demonstrated the Delegated Administration features, which are under the final stages of development and testing. GigaTrust's ability to support external clients and CAD file formats as well as demonstrate features such as Delegated Administration were keys to solving the content security needs of this client.

Client Satisfaction Is the Proof

"Sharing our drawings and trade secrets with our partners and clients is critical to our business success and GigaTrust allows us to do this confidently without information leaks or loss of time to the production schedule."

About GigaTrust

GigaTrust is a cutting-edge provider of email security and content protection software products and services with customers in both the public and private sectors. GigaTrust is the only provider of the Intelligent Rights Management™ solution, which combines innovative next-generation content security technologies built on the foundation of Microsoft® Rights Management Services. In February 2003, the firm formed a strategic partnership with Microsoft and formally launched the first in the family of proprietary Intelligent Rights Management products based on the Rights Management Services (RMS) security platform. GigaTrust is a Microsoft Gold Certified Partner. GigaTrust's family of products and services is easy to use and easy to deploy for either the author or recipient of protected content. GigaTrust's products and services include security solutions for email/attachments and document protection, automated external user provisioning, web content, network file shares, content repositories, discovery enablement, and the BlackBerry mobile device.
